Land cover data courtesy of the USGS National Land Cover Database.

Map prepared by Izzy McDonald, 1 Dec 2023.

Candidate area was considered land that satisfied the following requirements:

1. Moderate to high burn severity.
2. South facing slopes.
3. Slopes as steep or steeper than 12 degrees.
4. Between 6500' and 9000' elevation.
5. Within 3 miles of a road.
6. Previously forested before the fire.

29952 acres of area met these requirements.
